

# Agave NATURE SMOOTH EXPRESS TREATMENT

HEALING OIL™

## READ BEFORE USE:

- SHAKE WELL before application
- Only apply single deposit color after Nature Smooth Express Treatment.
- IF COLORING OR HIGHLIGHTING. Use 20 volume developer or less, for high lift/platinum blonde highlights wait at least 3 days.
- Always start your ironing at the lower end of the temperature range.
- Do not use over Henna or any Metallic Color.
- Gloves must be worn during treatment to avoid irritation from low PH.
- Not recommended for children under 12.
- Avoid contact with eyes. Rinse thoroughly if contact occurs.
- Do not apply directly on scalp.
- When applying product make sure sections stay moist and lathered. If hair is porous feel free to add more treatment until lathering occurs.

BEFORE

AFTER

## STEP ONE – PREPARATION

- Wet hair
- Shampoo hair with Agave Clarifying Shampoo.
- Rinse thoroughly and towel dry hair.

## STEP TWO – APPLICATION

- Shake bottle well.

HAIR	AMOUNT
Short	1 oz
Medium	2 oz
Long	3 oz

- Section hair into quadrants.
- Starting in the nape, take 1" sections.
- Apply and massage product generously.
- Complete entire head.

## STEP THREE – PROCESSING

- Wait 20-40 minutes depending on hair type.

HAIR TEXTURE	PROCESSING TIME
Fine	20 minutes
Medium	30 minutes
Thick/Coarse	40 minutes

- Rinse product out completely with warm water and remove excess with a towel.

## STEP FOUR – BLOW DRYING

- Dry hair 100% with a blow dryer.
- Client is free to leave at this point. Results last up to 1 month depending on hair type.

## STEP FIVE – IRONING

- Split the hair into quadrants.
- For maintaining natural texture iron 1" sub sections. For smoother results iron ¼" sub sections.
- Using temperature chart below, start ironing at the lower end of the temperature range and gradually increase your temperature until desired results are met.

HAIR TEXTURE, TYPE	TEMPERATURE RANGE	# OF PASSES /RESULT
Fine, Virgin	360-380°F (182-193°C)	4/anti-frizz, 6/straight
Medium, Virgin	380-420°F (193-215°C)	5/anti-frizz, 7/straight
Thick/Coarse, Virgin	420-450°F (215-232°C)	6/anti-frizz, 8/straight
Fine, Color/Chemically Treated	360-375°F (182-190°C)	4/anti-frizz, 6/straight
Medium, Color/Chemically Treated	360-375°F (182-190°C)	5/anti-frizz, 7/straight
Thick/Coarse, Color/Chemically Treated	375-400°F (190-204°C)	6/anti-frizz, 8/straight
All Hair Types, Sodium Hydroxide	325-350°F (162-176°C)	4 passes
Fine, Hi-Lift/Bleached	325-350°F (162-176°C)	4/anti-frizz, 7/straight
Medium, Hi-Lift/Bleached	350-375°F (176-190°C)	4/anti-frizz, 7/straight
Thick/Coarse, Hi-Lift/Bleached	375-400°F (190-204°C)	4/anti-frizz, 7/straight

## STEP SIX – FINISHING

- When ironing process is complete, your client is free to leave.
- IF COLORING OR HIGHLIGHTING- Use 20 volume developer or less, for high lift/platinum blonde highlights wait at least 3 days.
